How to buy Dentacoin (DCN) with Ether (ETH) using MyEtherWallet

ATTN: Don't try to buy Dentacoin (DCN) by sending Ether (ETH) to our contract from any exchange platform as your assets could be lost. Instead, follow the instructions below.

1. Go to https://www.myetherwallet.com/#send-transaction and access your Ether wallet in the desired way. **ATTN:** If you don't have a wallet or you have a wallet but you are not sure how to access it, please follow these instructions.

2. Make sure you have added Dentacoin as a Custom Token in your wallet, so you can check the amount of Dentacoins you own afterwards. This is done as follows:

    2.1. Below the Account Balance section on the right side of the page, you will see the Token Balances section. Click the "Add Custom Token" button.
    2.2. In the fields Address, Token Symbol, Decimals, enter the following:
    Token address: 0x08d32b0da63e2C3bcF8019c9c5d849d7a9d791e6
    Token symbol: DCN
    Decimals: 0

    2.3. Click the Save button. And you're done.

3. Ready to buy DCN? In the section Send Ether & Token fill in the following:
    3.1. To Address: 0x08d32b0da63e2C3bcF8019c9c5d849d7a9d791e6
    3.2. Amount to Send – the ETH amount you would like to exchange for DCN.

ATTN: In order to buy Dentacoin, you should have a certain amount of Ether (ETH) in advance. You don't have Ether (ETH)? You can buy it on platforms like: [Bitpanda](#), [Coinbase](#), [Kraken](#), [Poloniex](#), [Bittrex](#), [Ether Rush](#) (India) and then just transfer it to your wallet.

3.3. Gas Limit will be automatically generated – change it to 200 000 so that your transaction goes through.

3.4. Then click on "Generate Transaction" and confirm it.
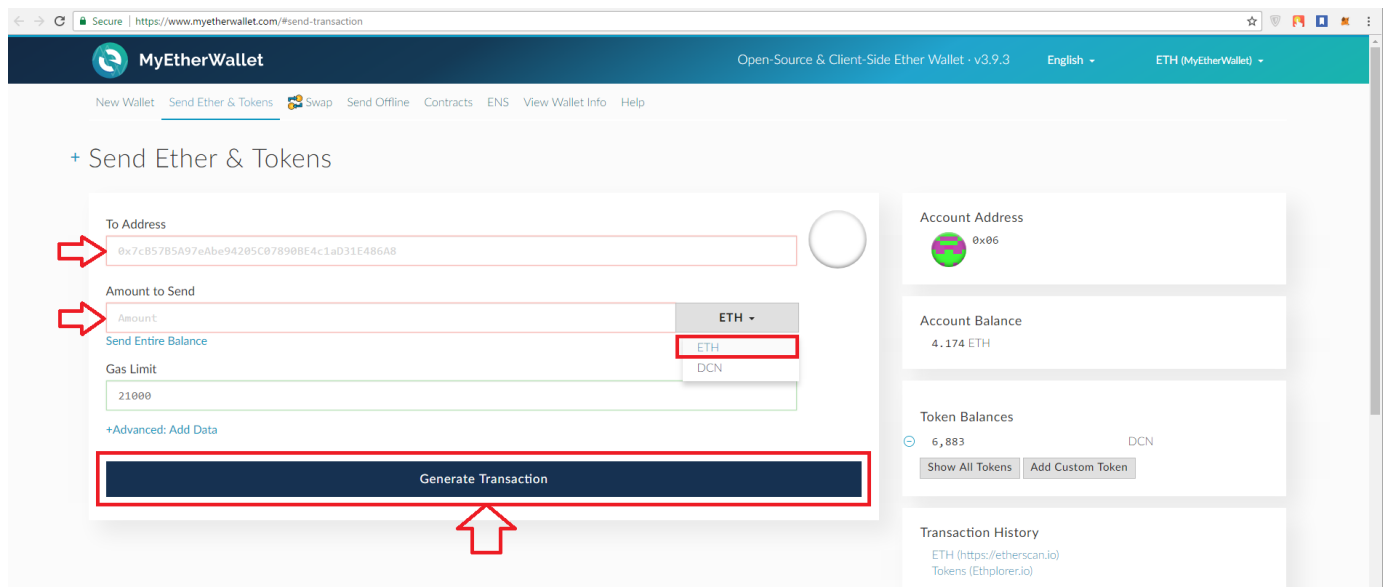

4. After the transaction has been processed, you must see your DCN in the Token Balances section.
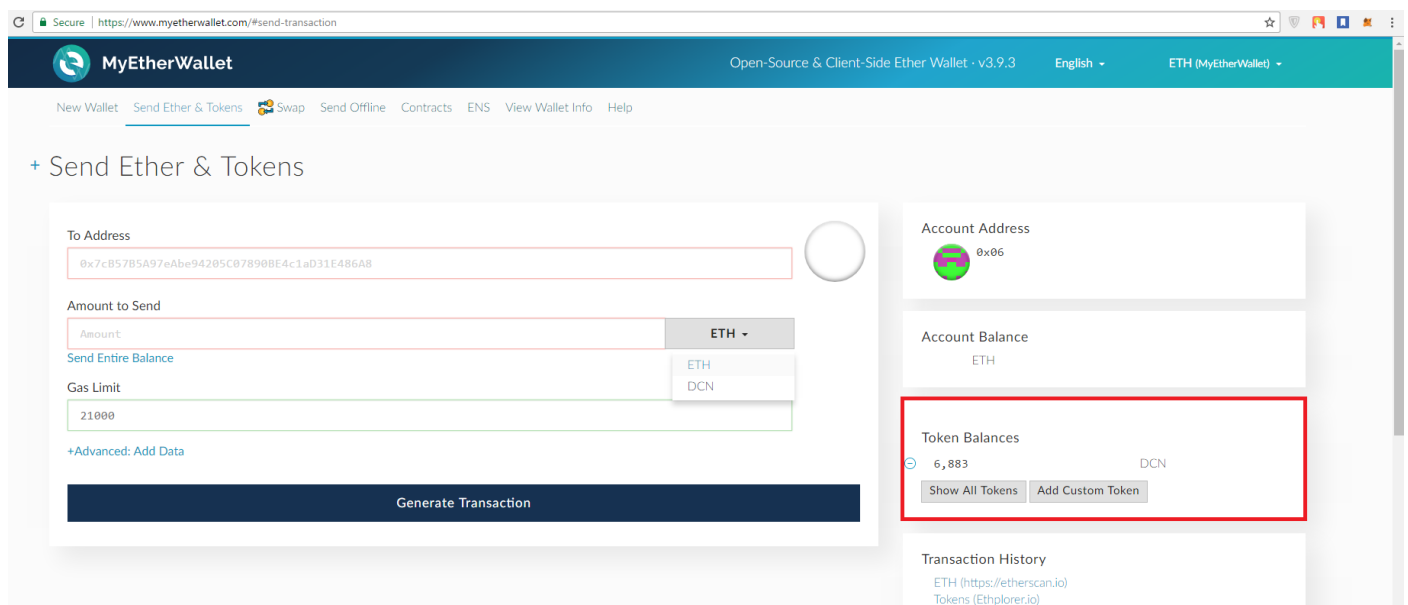

5. Well, that's just it. Welcome on board!

Security recommendation!

MyEtherWallet is an appropriate option for storing your DCN. For a next level of security, you can consider a hardware wallet such as TREZOR or Ledger Nano S.
